# What's the Buzz?

Region 3 MCIR

Remember! To make a change to a patient's name, birthdate, gender, or vaccines from another office go to your Region 3 MCIR News Screen & print off the Petition for Modification Form!!

## MCIR-VFC Meetings Held at Local County Health Departments

Region 3 MCIR, along with the Local Health Department Staff of Clinton, Gratiot, Ingham and Montcalm Counties held their biannual MCIR-VFC meeting in November.

Kevin Czubachowski and Barb Day, MDCH Immunization Field Representatives attended the meetings and provided updated vaccine information.

Kevin did a great job of explaining the VFC vaccine eligibility rules and regulations. Frequently, we get questions at Region 3 regarding the different eligibilities, so we were pleased with his presentation.

Lisa Mikesell, from MMDHD and Wendy Ridenour of ICHD went over the current vaccine changes and discussed the ACIP recent rulings.

The VFC/MCIR meetings will be held again late Spring or early Summer. Watch your MCIR News Screen for upcoming dates!

**M**CIR has added a new **"MCV4 (historical)"** option under the Add Immunizations drop down vaccine list, for types "No Inventory" and "Historical". The **MCV4 (historical)** allows providers to enter a MCV4 dose into a MCIR record when a specific vaccine brand is not known, such as when entering "Other Provider Data". **Providers should continue to choose the specific MCV4 brand for doses provided at their office.** The former historical option "Meningococcal (historical)" will not assess as a dose if chosen. See Below:

## A Manage Inactive link

has been added to the Manage Inventory screen in the Vaccine Inventory Module (VIM). This link provides a listing of inactive lots dated back to the when provider's VIM was activated. This link has been added as an addition to the original Show Inactive Lots link, which provides a limited list of lots inactivated more recently. Unlike the Show Inactive Lots link, the Manage Inactive link can sort by vaccine to narrow a search when looking for a specific vaccine lot number.

### Manage Inventory - VFC/Public

### November Quiz Answers

1. The county in Region 3 with the highest profile percentage for August 2011 is: Montcalm
2. A higher profile percentage is important to achieve because it shows the practice is keeping your community healthy.
3. To run a Provider Profile on adolescents between the ages of 11 years thru 18 years of age, you would enter the age range as: 132

Congratulations to Wendy Colborn of Sparrow Medical Group Lansing.

Wendy turned in correct answers to all of the Fall Newsletter Quiz Questions!

### Winter Newsletter Challenge

1. The **MCV4 (historical)** allows providers to enter a MCV4 dose into a MCIR record when a specific vaccine \_\_\_\_\_.
2. You can find the date a lot was added into your VIM in the: \_\_\_\_\_.
3. You need to submit a \_\_\_\_\_ form to change a patient's name, gender, or birthdate in the MCIR system.

BONUS: You can find a link to this form on The Region 3: \_\_\_\_\_.

Send your answers to: [lmoody@mmdhd.org](mailto:lmoody@mmdhd.org) One winner will be chosen from all of the correct answers submitted by March 30th!
