EXPEDITED PARTNER THERAPY

Expedited Partner Therapy (EPT) is the clinical practice of treating the sex partners of persons with chlamydia or gonorrhea, by providing medicines or prescriptions to the patient.

EPT can be offered to heterosexual patients when the provider cannot confidently ensure that all of the patient's sex partners from the prior 60 days will be treated.

More information on EPT can be found at <https://www.cdc.gov/std/ept>

LEGAL AUTHORITY

Michigan's Communicable Disease rules are promulgated under the authority conferred on the Department of Health and Human Services by section 5111 of Act No. 368 of the Public Acts of 1978, as amended, being 333.5111 of the Michigan Compiled Laws. Violations of these laws will be reported to the State of Michigan, and may constitute a misdemeanor under MCL 333.2261. For additional reporting requirements regarding HIV and AIDS please refer to MCL 333.5101 et seq. Health care professionals are advised to consult with their local health departments or legal counsel if they have questions about their responsibilities regarding these rules.

The Michigan Department of Health and Human Services maintains, reviews and revises the list of reportable conditions at least annually. Please refer to the Michigan Communicable Disease Information website at www.michigan.gov/cdinfo

The Privacy Rule in the Health Insurance Portability and Accountability Act of 1996 (HIPAA) allows for the disclosure of protected health information, without individual client or patient authorization, to public health authorities, who are legally authorized to receive such reports for the purpose of preventing or controlling disease.

STI TREATMENT GUIDELINES

Please refer to "STD diagnostic and Treatment Guidelines" or the Centers for Disease Control and Prevention's (CDC) website www.cdc.gov/std/treatment for further information on treating chlamydia, gonorrhea and other STIs.
