Independent Auditors' Report

Board of Public Health Mid-Michigan District Health Department Stanton, Michigan

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities and the major fund of the Mid-Michigan District Health Department (the Department), as of and for the year ended September 30, 2021, and the related notes to the financial statements, which collectively comprise the Department's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and the major fund of the Mid-Michigan District Health Department, as of September 30, 2021, and the respective changes in financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, budgetary comparison information, municipal employees' retirement system schedules and other post-employment benefit schedules, as identified in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information, because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated March 18, 2022 on our consideration of the Mid-Michigan District Health Department's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Mid-Michigan District Health Department's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Mid-Michigan District Health Department's internal control over financial reporting and compliance.

Mid-Michigan District Health Department Management's Discussion and Analysis

September 30, 2021

This section of the annual financial statements, titled Management's Discussion and Analysis, represents the administration's review of the Department's financial performance during the fiscal year ended September 30, 2021, and is a requirement of GASB 34. The Management's Discussion and Analysis is intended to be read in conjunction with the Department's financial statements.

Generally accepted accounting principles (GAAP) according to GASB 34 require the reporting of two types of financial statements: Government-wide financial statements and Fund Level financial statements.

Financial Highlights

- The assets and deferred outflows of resources of the Department exceeded its liabilities and deferred inflows of resources at September 30, 2021 by \$542,623 at the government-wide level. There is a balance of \$1,563 in unrestricted net position to meet the Department's ongoing obligations.
- The Department's total net position increased by \$143,105 as a result of this year's operations.
- As of September 30, 2021, the Department's governmental fund reported an ending fund balance of \$2,786,838, an increase of \$78,025.
- As of September 30, 2021, the unassigned fund balance was \$567,740.

Overview of the Financial Statements

The Department's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains required supplementary information in addition to the basic financial statements themselves.

Government-wide Financial Statements: The government-wide financial statements provide information about the activities of the entire Department. They present an overall view of the Department's finances for the fiscal year ending September 30, 2021.

The statement of net position presents information on all of the Department's assets and deferred outflows of resources, and liabilities and deferred inflows of resources, with the difference between these reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the Department is improving or deteriorating.

The statement of activities presents information showing how the Department's net position changed during fiscal year 2020/2021. All changes in net position are reported as soon as the change occurs, regardless of the timing of related cash flows.

All of the Department's offices are supported by intergovernmental revenues, governmental grants, donations, fees and charges for services, interest, and local contributions. The governmental activities of the Department are all considered health and sanitation programs.

The government-wide financial statements include only financial information related to the Department.

Fund Financial Statements: A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The Department uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The Department operates with one fund, which is considered a governmental fund.

Governmental funds: Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year.

Mid-Michigan District Health Department Management's Discussion and Analysis September 30, 2021

Such information may be useful in evaluating the Department's near-term financing requirements. Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the Department's near-term financing decisions. Both the governmental fund balance sheet and governmental fund statement of revenues, expenditures, and changes in fund balance provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The Department adopts an annual appropriated budget for its General Operating Fund. A budgetary comparison statement has been provided for this fund to demonstrate compliance with this budget.

The basic financial statements can be found starting on page 3-1 of this report.

Notes to the Financial Statements: The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found starting on page 3-7 of this report.

Required Supplementary Information: In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information concerning budgeted revenues and expenditures on page 4-1, and information related to the defined pension plan and retired employees' health care plans starting on page 4-2.

Government-wide Financial Analysis

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. In the case of the Department, assets and deferred outflows of resources exceeded liabilities and deferred inflows of resources by \$542,623. A comparative analysis of data with the previous fiscal year is as follows:

	2021	2020
Current and other assets Capital assets	\$4,689,419 277,562	\$3,959,860 262,093
Total assets	4,966,981	4,221,953
Deferred outflow of resources	1,299,288	717,305
Current liabilities	1,680,348	1,200,614
Noncurrent liabilities	3,488,992	2,931,946
Total liabilities	5,169,340	4,132,560
Deferred inflow of resources	554,306	407,180
Net position		
Investment in capital assets	277,562	262,093
Restricted for Dental Clinic	95,209	95,209
Medicaid cost based reimbursement	168,289	168,289
Unrestricted	1,563	(126,073)
Total net position	<u>\$542,623</u>	\$399,518

Mid-Michigan District Health Department Management's Discussion and Analysis September 30, 2021

Unrestricted net position (the part of net position that can be used to finance day-to-day operations) increased by \$143,105. The main reason for the increase relates to an increase in the deferred outflows related to the net pension liability based on the actuarial calculations. Net position invested in capital assets increased by \$15,469. The current level of unrestricted net position for the governmental activities stands at \$1,563.

The following table shows the changes of net position for the years ended September 30, 2021, and 2020.

	2021	2020
Program revenues		
Charges for services	\$1,025,085	\$1,249,448
Operating grants and contributions	5,177,213	4,050,036
General revenue		
County appropriations	1,372,873	1,445,731
Interest/Miscellaneous	20,198	20,101
Gain on Capital Assets	56	100
Total revenues	7,595,425	6,765,416
Program expenses	7,452,320	6,893,041
Change in net position	<u>\$143,105</u>	<u>\$(127,625)</u>

Total expenses increased 8.1% over the previous fiscal year and revenue increased 12.3%.

Financial Analysis of the Department's Fund

As noted earlier, the Department uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental Fund: The focus of the Department's governmental fund is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the Department's financing requirements. In particular, unassigned fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, the Department's governmental fund reported a total ending fund balance of \$2,786,838, an increase of \$78,025 in comparison with the prior year. Certain constraints have been placed on fund balance at September 30, 2021. Of the total fund balance, \$1,844,484, or 66% of the total, has been committed for the general operating fund. Committed fund balances are amounts that are constrained for certain purposes that have been approved by the Board of Public Health. Commitments of fund balance can be established, modified, or rescinded by a resolution from the Board of Public Health. The restricted and non-spendable fund balances total \$374,614 and the unassigned fund balance is \$567,740. As a measure of liquidity, it may be useful to compare committed and unassigned fund balance to the total fund expenditure. Committed and unassigned fund balance represents 33% of the total fund expenditures.

Mid-Michigan District Health Department Management's Discussion and Analysis

September 30, 2021

Governmental Fund Budgetary Highlights

Over the course of the year, the Department's Board of Public Health may amend the budget to take into account events that occur during the year. For the year ended September 30, 2021, budget amendments primarily increased and decreased licenses and permits, intergovernmental, and charges for services revenue and certain expenditure line items, especially those related to the approved capital expense projects by amounts necessary to maintain consistency with actual activities for the fiscal year. In total, the Department's amended expenditure budget changed from \$6,758,528 to \$7,669,736, which represented an increase in the overall agency budget, mainly related to COVID-19 grant related expenses. The actual expenditures came in at \$7,345,600.

Capital Asset and Debt Administration

Capital Assets: The Department's investment in capital assets as of September 30, 2021, amounts to \$277,562 (net of accumulated depreciation). More information is reported in footnote 5.

Long-term Obligations: The Department has long-term obligations related to compensated absences (e.g., unused vacation and personal leave). The total obligation for compensated absences and related payroll taxes at September 30, 2021, was \$401,889.

Economic Factors and Next Year's Budget and Rates

For the fiscal year ending September 30, 2021, the agency will need to continue to monitor Federal and State budget actions and continue to monitor emerging threats. State grant agreements including those that originate at the federal level and other State funding mechanisms such as Essential Local Public Health Services, Medicaid Cost, and Rated Based Reimbursement funding supplements are a large portion of our budget and therefore, funding changes at the State level directly impact our operations and needs to be closely monitored. The Department continues to closely monitor Environmental Health permit applications activity and Community Health and Education charge for services to determine if there are any significant changes in activity.

Requests for Information

This financial report is designed to provide a general overview of the Department's finances for all those with an interest in the Department's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to:

Mid-Michigan District Health Department Governmental Fund

Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances of Governmental Fund to the Statement of Activities For the Year Ended September 30, 2021

Net change in fund balances - total governmental fund	\$ 78,025
Total change in net position reported for governmental activities in the statement of activities is different because:	
Governmental funds report capital outlays as expenditures. However, in the statement of activities the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. Depreciation expense	(81,606)
Capital outlay	97,075
Revenues in the statement of activities that do not provide current financial resources are not reported as revenue in the funds.	
Financing lease	171,800
Expenses are recorded when incurred in the statement of activities. Compensated absences	(23,831)
The statement of net position reports the net pension liability and deferred outflows of resources and deferred inflows related to the net pension liability and pension expense. However, the amount recorded on the governmental funds equals actual pension contributions.	
Net change in net pension liability Net change in the deferred inflows of resources related to the net pension liability Net change in the deferred outflows of resources related to the net pension liability	(518,209) (144,227) 582,762
The statement of net position reports the total OPEB liability and deferred outflows of resources and deferred inflows related to the total OPEB liability and OPEB expense. However, the amount recorded on the governmental funds equals actual OPEB contributions.	
Net change in total OPEB liability Net change in the deferred inflows of resources related to the total OPEB liability Net change in the deferred outflows of resources related to the total OPEB liability	(15,006) (2,899) (779)
Change in net position of governmental activities	\$ 143,105

Notes to the Financial Statements September 30, 2021

Note 1 - Summary of Significant Accounting Policies

Reporting entity

The Mid-Michigan District Health Department (the Department) is a joint venture between Montcalm, Gratiot and Clinton Counties, and was established to provide public health services.

The Board of Public Health is represented by and provides services to Montcalm, Gratiot and Clinton Counties. Each County provides annual appropriations. The current funding formula approved by the Board of Public Health requires Montcalm, Gratiot and Clinton Counties to provide approximately 38, 26, and 36 percent, respectively, of the total County appropriations. The percentages are calculated annually based on the formula in the intergovernmental agreement. In addition, the treasury function for the Department rests with the Montcalm County Treasurer.

Government-wide and fund financial statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all of the nonfiduciary activities of the primary government.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. *Direct expenses* are those that are clearly identifiable with a specific function or segment. Amounts reported as *program revenues* include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions. General appropriations and other items not properly included among program revenues are reported instead as *general revenues*. Internally dedicated resources are reported as *general revenues* rather than as program revenues. Likewise, general revenues include all county appropriations.

Separate financial statements are provided for governmental funds. The Department only has one fund reported in the fund financial statements.

Measurement focus, basis of accounting, and financial statement presentation

The government-wide financial statements are reported using the *economic resources measurement focus* and the *accrual basis of accounting*. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Revenues susceptible to accrual include state and federal grants and interest income. Other revenues are not susceptible to accrual because generally they are not measurable until received in cash. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the *current financial resources measurement focus* and the *modified accrual basis of accounting.* Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be *available* when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 60 days of the end of the current fiscal period. Revenues related to grants are considered available if collected within 180 days due to the State of Michigan's slow payment. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

The government reports the following major governmental fund:

The General Operating Fund is used to account for all financial resources of the Department, which includes expenditures primarily for specified health related purposes.

Notes to the Financial Statements September 30, 2021

Assets, liabilities, and net position or equity

Cash – Cash is considered to be cash on hand, demand deposits, and short-term investments with a maturity of three months or less when acquired.

Cash on deposit with fiscal agent – Cash on deposit with the Montcalm County Treasurer.

Receivables – Receivables consist of amounts due from governmental units for various grant programs and accounts receivable for charges for services to clients and other organizations.

The Department has recognized the revenue related to charges for services at the time the services are performed and billed to the extent such amounts are estimated to be received. Contractual adjustments by third-party payers are treated as a reduction to revenues.

Inventories – Inventories are valued at cost, on a first-in, first-out basis. Donated vaccine inventory consists of vaccines received from the State of Michigan and is stated at fair value as of the date of donation. Vaccine inventory received from the State of Michigan that is on hand at year-end has been reported as unearned revenue. They are reported as expenditures at the time individual inventory items are used.

Prepaid items – Certain payments to vendors reflect costs applicable to future fiscal years. For such payments in governmental funds the Department follows the consumption method, and they therefore are capitalized as prepaid items in both government-wide and fund financial statements.

Capital assets – Capital assets are reported in the government-wide financial statements. Capital assets are defined by the Department as assets with an initial individual cost of more than \$5,000 and an estimated useful life in excess of one year. Such assets are recorded at historical cost or estimated historical cost, if purchased or constructed.

The reported value excludes normal maintenance and repairs which are essentially amounts spent in relation to capital assets that do not increase the capacity or efficiency of the item or extend its useful life beyond the original estimate. In the case of donations, the Department values these capital assets at the estimated fair value of the item at the date of its donation.

Capital assets are depreciated using the straight-line method over the following useful lives:

Equipment 5 - 20 years Leasehold improvements 10 years

Deferred outflows of resources – The Department reports deferred outflows of resources as a result of pension earnings. This amount is the result of a difference between what the plan expected to earn from plan investments and what is actually earned. This amount will be amortized over the next four years and included in pension expense. Changes in assumptions and experience differences relating to the net pension liability and total OPEB liability are deferred and amortized over the expected remaining services lives of the employees and retirees in the plan. The Department also reported deferred outflows of resources for pension contributions made after the measurement date. This amount will reduce net pension liability in the following year.

Due to others – The Department serves as the fiduciary on monies that are to be used for specific purposes. For example, other agencies have provided funding for a dental center expansion. Until all of the funds are raised and the project begins, these funds could possibly be paid back to the other agencies.

Unearned revenue – The governmental fund reports unearned revenue in connection with resources that have been received but not yet earned. The Department records unearned revenue in connection with the inventory previously discussed.

Mid-Michigan District Health Department Notes to the Financial Statements

September 30, 2021

Compensated absences – It is the Department's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. Leave time is accrued when incurred in the government-wide financial statements. A liability for these amounts is reported in governmental funds only if they have matured, for example, as a result of employee resignations and retirements.

Pensions – For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the Municipal Employees Retirement System (MERS) of Michigan and additions to/deductions from MERS' fiduciary net position have been determined on the same basis as they are reported to MERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

Other post-employment benefits (OPEB) – For purposes of measuring the total OPEB liability, deferred outflows of resources and deferred inflows of resources related to OPEB, and OPEB expense, information about the fiduciary net position of the Plan and additions to/deductions from the Plan's fiduciary net position have been determined on the same basis as they are reported by the Plan. For this purpose, the Plan recognizes benefit payments when due and payable in accordance with the benefit terms. Investments are reported at fair value, except for money market investments and participating interest earning investment contracts that have a maturity at the time of purchase of one year or less, which are reported at cost.

Deferred inflows of resources – A deferred inflow of resources is an acquisition of net position by the Department that is applicable to a future reporting period. For the governmental fund this includes unavailable revenue in connection with receivables for revenues that are not considered available to liquidate liabilities of the current period. The Department reports deferred inflows of resources as a result of pension earnings. This amount is the result of a difference between what the plan expected to earn from the plan investments and what the plan actually earned. This amount will be amortized over the next four years and included in pension expense. Changes in assumptions and experience differences relating to the net pension liability and total OPEB liability are deferred and amortized over the expected remaining services lives of the employees and retirees in the plan.

Fund Balance – In the fund financial statements fund balance is reported in the following categories:

Non-spendable – assets that are not available in a spendable form.

Restricted – amounts that are legally imposed or otherwise required by external parties to be used for a specific purpose.

Committed – amounts constrained on use imposed by the Department's highest level of decision-making, its Board of Public Health. A fund balance commitment may be established, modified, or rescinded by a resolution of the Board of Public Health.

Assigned – amounts intended to be used for specific purposes, as determined by the Board of Public Health, the budget or finance committee, or delegated official. The Board of Public Health has not anyone the authority to assign funds.

Unassigned – all other resources; the remaining fund balances after non-spendable, restrictions, commitments and assignments.

Mid-Michigan District Health Department Notes to the Financial Statements September 30, 2021

The following amounts have been committed for the general operating fund:

Equipment	\$ 489,494
Facility development	124,580
Self-insurance bonds	13,950
Retirement	323,830
Vacation and sick leave	373,330
Unemployment	55,000
Training	35,000
Behavioral Risk Factor Survey (BRFS)	11,522
Health insurance	160,000
OPEB liability	57,778
CHW program	200,000
	\$ 1,844,484

When an expenditure is incurred for purposes for which both restricted and unrestricted fund balance is available, the Department's policy is to consider restricted funds spent first.

When an expenditure is incurred for purposes for which committed, assigned, or unassigned amounts could be used, the Department's policy is to consider the funds to be spent in the following order: (1) committed, (2) assigned, (3) unassigned.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, deferred outflows, liabilities, deferred inflows and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

Adoption of New Accounting Standards

Statement No. 97, Certain Component Unit Criteria, and Accounting and Financial Reporting for Internal Revenue Code Section 457 Deferred Compensation Plans, (1) increases consistency and comparability related to the reporting of fiduciary component units in circumstances in which a potential component unit does not have a governing board and the primary government performs the duties that a governing board typically would perform; (2) mitigates costs associated with the reporting of certain defined contribution pension plans, defined contribution other postemployment benefit (OPEB) plans, and employee benefit plans other than pension plans or OPEB plans (other employee benefit plans) as fiduciary component units in fiduciary fund financial statements; and (3) enhances the relevance, consistency, and comparability of the accounting and financial reporting for Internal Revenue Code (IRC) Section 457 deferred compensation plans (Section 457 plans) that meet the definition of a pension plan and for benefits provided through those plans.

Upcoming Accounting and Reporting Changes

Statement No. 87, *Leases* increases the usefulness of the financial statements by requiring recognition of certain lease assets and liabilities for leases that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract. It establishes a single model for lease accounting based on the foundational principle that leases are financings of the right to use an underlying asset. A lessee will be required to recognize a lease liability and an intangible right-to-use a lease asset, and a lessor will be required to recognize a lease receivable and a deferred inflow of resources, thereby enhancing the relevance and consistency of information about leasing activities. The requirements of this Statement are effective for the fiscal year ending September 30, 2022.

Notes to the Financial Statements September 30, 2021

Statement No. 96, Subscription-Based Information Technology Arrangements, is based on the standards established in Statement No. 87 Leases. This statement (1) defines a SBITA as a contract that conveys control of the right to use a SBITA vendor's IT software, alone or in combination with tangible capital assets, as specified in the contract for a period of time in an exchange or exchange-like transaction (2) requires governments with SBITAs to recognize a right-to-use subscription asset, an intangible asset, and a corresponding subscription liability, and (3) provides guidance related to outlays other than subscription payments, including implementation costs, and requirements for note disclosures related to a SBITA. This statement is effective for the year ending September 30, 2023.

The Department is evaluating the impact that the above GASBs will have on its financial reporting.

Note 2 - Budget Accountability

Budgetary information

Annual budgets are adopted on a basis consistent with accounting principles generally accepted in the United States of America for the General Operating Fund. All annual appropriations lapse at fiscal year end. Any revisions that alter the total expenditures of an activity must be approved by the Board of Public Health.

Note 3 - Cash

At year end deposits were reported in the financial statements in the following categories:

	Cash and Cash Equivalents		Cash on Deposit with Fiscal Agent	Total
Governmental activities	\$	9,294	\$ 4,148,891	\$ 4,158,185

The breakdown between deposits and investments is as follows:

Bank deposits (checking and savings accounts)	\$ 8,099
Cash on deposit with fiscal agent	4,148,891
Petty cash and cash on hand	1,195
	\$ 4,158,185

Interest rate risk – The Department does not have a formal investment policy to manage its exposure to fair value losses from changes in interest rates.

Credit risk – State statutes and the Department's investment policy authorize the Department to make deposits and invest in the accounts of federally insured banks, credit unions, and savings and loan associations which have an office in Michigan. The Department is allowed to invest in bonds, securities and other obligations of the United States, or any agency or instrumentality of the United States. United States government or federal agency obligations; repurchase agreements; bankers acceptance of United States Banks; commercial paper rated within the two highest classifications which mature not more than 270 days after the date of purchase; obligations of the State of Michigan or any of its political subdivisions, which are rated as investment grade; and mutual funds composed of investment vehicles that are legal for direct investment by local units of government in Michigan. Concentration of credit risk – The government has no policy that would limit the amount that may be issued in any one issuer.

Mid-Michigan District Health Department Notes to the Financial Statements September 30, 2021

Custodial credit risk – deposits – In the case of deposits, this is the risk that in the event of bank failure, the Department's deposits may not be returned to it. The Department does not have a policy for custodial credit risk. As of year end, the bank deposits were not exposed to custodial credit risk. The cash on deposit with Montcalm County is part of the County pooled cash and investments. As a result, the insured and uninsured amounts related to these funds cannot be determined.

Note 4 - Long-term Contracts Receivable

The Department entered into agreements with Michigan Community Dental Clinics, Inc. (MCDC) to lease office space and turnover the Department's dental services to MCDC. In return, MCDC is paying the Department a sum of money over a period of 10 years. The amounts attributable to these long-term contracts receivable have been recorded at the fund level as contracts receivable and deferred inflows of resources. The office space being leased has a cost of \$66,777 and accumulated depreciation of \$60,686, for net carrying value of \$6,121. The following is a summary of future annual revenue from MCDC for the remaining agreements:

Year Ending September 30,	Total		
2022	\$	23,600	
2023		23,600	
2024		23,600	
2025		23,600	
2026		23,600	
Thereafter		104,233	
	\$	222,233	

Mid-Michigan District Health Department Notes to the Financial Statements September 30, 2021

Note 5 - Capital Assets

Capital assets activity for the current year is as follows:

	eginning Balance	<u>In</u>	creases	Dec	reases	Ending Balance
Governmental activities Capital assets being depreciated						
Equipment Leasehold improvements	\$ 891,536 19,731	\$	97,075 -	\$	- -	\$ 988,611 19,731
Total capital assets being depreciated	911,267		97,075		-	 1,008,342
Less accumulated depreciation for						
Equipment Leasehold improvements	641,389 7,785		80,598 1,008		-	721,987 8,793
Total accumulated depreciation	 649,174		81,606		-	730,780
Net capital assets being depreciated	 262,093		15,469		_	277,562
Governmental activities capital assets, net	\$ 262,093	\$	15,469	\$	-	\$ 277,562

Depreciation expense was charged to programs of the primary government as follows:

Governmental activities	
Community health and education	\$ 46,095
Environmental health	1,204
Administration	34,307
Total governmental activities	<u>\$ 81,606</u>

Note 6 - Long-Term Debt

Long-term obligations include compensated absences. Compensated absences are liquidated with funds from the general operating fund. Compensated absences are a liability to the Department which are split between current and noncurrent liabilities within the government-wide financial statements based on an estimate of when they will be due and payable. Payments to employees for compensated absences are recorded as expenditures when they are used and payments are actually made to the employees at the fund level.

Long-term obligation activity is summarized as follows:

	В	eginning				Ending	Dι	ue Within
	E	Balance	 Additions	R	eductions	Balance		ne Year
Governmental activities								
Compensated absences	\$	378,058	\$ 318,375	\$	294,544	\$ 401,889	\$	294,544

Notes to the Financial Statements September 30, 2021

Note 7 - Risk Management

The Department is a voluntary member of the Michigan Municipal Risk Management Authority which is organized under Public Act 138 of 1982, as amended as a governmental group self-insurance pool. Public Act 138 authorizes local units of government to exercise jointly any power, privilege, or authority which each might exercise separately. The Authority administers a risk management fund providing the Department with loss protection for general liability, property damage, and losses due to crime. Settled claims relating to the insurance have not exceeded the amount of insurance coverage in any of the past three fiscal years.

The Department also carries commercial insurance for the risk of loss due to workers' compensation and healthcare professional liability claims. Settled claims relating to the commercial insurance have not exceeded the amount of insurance coverage in any of the past three years.

Note 8 - Employee Retirement and Benefit Systems

Defined benefit pension plan

Plan description – The Department participates in the Michigan Municipal Employees' Retirement System (MERS), an agent multiple-employer, statewide public employee defined benefit pension plan that covers all employees of the government. The plan was established by the Michigan Legislature under Public Act 135 of 1945 and administered by a nine-member Retirement Board. The system provides retirement, disability and death benefits to plan members and their beneficiaries. MERS issues a publicly available financial report that includes financial statements and required supplementary information for the system. That report may be obtained by writing to MERS at 1134 Municipal Way, Lansing, Michigan 48917 or on the web at http://www.mersofmich.com.

Benefits provided – Benefits provided include plans with multipliers ranging from 2.00% to 2.25%. Vesting periods range from 6 to 10 years. Normal retirement age is 60 with early retirement at 50 with 25 years of service or 55 with 15 years of service. Final average compensation is calculated based on 5 years. Member contributions range from 2.58% to 3.00%.

Employees covered by benefit terms – At the December 31, 2020 valuation date, the following employees were covered by benefit terms:

Inactive employees or beneficiaries currently receiving benefits	62
Inactive employees entitled to, but not yet receiving benefits	37
Active employees	77
	176

Contributions – The employer is required to contribute amounts at least equal to the actuarially determined rate, as established by MERS Retirement Board. The actuarially determined rate is the estimated amount necessary to finance the cost of benefits earned by employees during the year, with an additional amount to finance any unfunded accrued liability. The employer may establish contribution rates to be paid by its covered employees. Employer contributions range from 8.16% to 25.17% based on annual payroll for open divisions. There were no divisions closed to new hires as of December 31, 2020.

Net pension liability – The employer's net pension liability was measured as of December 31, 2020, and the total pension liability used to calculate the net pension liability was determined by an annual actuarial valuation as of that date.

Notes to the Financial Statements September 30, 2021

Actuarial assumptions – The total pension liability in the December 31, 2020 annual actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement include: 1) Inflation 2.5%; 2) Salary increases 3.00% in the long-term; 3) Investment rate of return of 7.35%, net of investment expense, including inflation.

Although no specific price inflation assumptions are needed for the valuation, the 3.00% long-term wage inflation assumption would be consistent with a price inflation of 2.5%.

Mortality rates used were based on the Pub-2010 Juvenile Mortality Tables, PubG-2010 Employee Mortality Tables, PubG-2010 Healthy Retiree Tables and PubNS-2010 Disabled Retiree Tables. Future mortality improvements are assumed each year using scale MP-2019 applied fully generationally from the Pub-2010 base year of 2010.

The actuarial assumptions used in valuation were based on the results of the most recent actuarial experience study.

The long-term expected rate of return on pension plan investments was determined using a model method in which the best-estimate ranges of expected future real rates of return (expected returns, net of investment and administrative expenses and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates or arithmetic real rates of return for each major asset class are summarized in the following table:

Asset Class	Target Allocation	Target Allocation Gross Rate of Return	Long-term Expected Gross Rate of Return	Inflation Assumption	Long-term Expected Real Rate of Return
Global equity	60.00%	7.75%	4.65%	2.50%	3.15%
Global fixed income	20.00%	3.75%	0.75%	2.50%	0.25%
Private investments	20.00%	9.75%	1.95%	2.50%	1.45%
	100.00%		7.35%		4.85%

Discount rate – The discount rate used to measure the total pension liability is 7.6%. The projection of cash flows used to determine the discount rate assumes that employer and employee contributions will be made at the rates agreed upon for employees and the actuarially determined rates for employers. Based on these assumptions, the pension plans fiduciary net position was projected to be available to pay all projected future benefit payments of current active and inactive employees. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

Notes to the Financial Statements September 30, 2021

Total Pension Liability	
Service cost	\$ 339,458
Interest on the total pension liability	957,613
Experience differences	343,386
Changes in actuarial assumptions	709,580
Benefit payments and refunds	 (622,875)
Net change in total pension liability	1,727,162
Total pension liability - beginning	 12,741,880
Total pension liability - ending (a)	\$ 14,469,042
Plan Fiduciary Net Position	
Employer contributions	\$ 409,518
Employee contributions	107,051
Pension plan net investment income	1,336,228
Benefit payments and refunds	(622,875)
Pension plan administrative expense	(20,969)
Net change in plan fiduciary net position	1,208,953
Plan fiduciary net position - beginning	10,405,272
Plan fiduciary net position - ending (b)	\$ 11,614,225
Net pension liability (a-b)	\$ 2,854,817
Plan fiduciary net position as a percentage of total pension liability	80.27%
Covered payroll	\$ 3,953,715
Net pension liability as a percentage of covered payroll	72.21%

Sensitivity of the net pension liability to changes in the discount rate – The following presents the net pension liability of the employer, calculated using the discount rate of 7.6%, as well as what the employer's net pension liability would be using a discount rate that is 1% point lower (6.6%) or 1% higher (8.6%) than the current rate.

	19	1% Decrease		iscount rate	1% Increase		
Total pension liability	\$	16,373,703	\$	14,469,042	\$	12,885,644	
Fiduciary net position		11,614,225		11,614,225		11,614,225	
Net pension liability	\$	4,759,478	\$	2,854,817	\$	1,271,419	

Notes to the Financial Statements September 30, 2021

Pension expense and deferred outflows of resources and deferred inflows of resources related to pensions – For the year ended September 30, 2021 the employer recognized pension expense of \$514,582. The employer reported deferred outflows and inflows of resources related to pensions from the following sources:

		Deferred		Deferred		
	Outflows of		Inflows of		A	mount to
	F	Resources	R	desources		Amortize
Differences in experience	\$	257,539	\$	(120,644)	\$	136,895
Differences in assumptions		715,601		-		715,601
Net difference between projected and actual earnings on plan investments				(406,550)		(406,550)
Contributions subsequent to the measurement date*		310,591		(400,330)		(400,330)
Total	\$	1,283,731	\$	(527,194)	\$	445,946

^{*}The amount reported as deferred outflows of resources resulting from contributions subsequent to the measurement date will be recognized as a reduction in the net pension liability for the fiscal year ending 2021.

Amounts reported as deferred outflows and inflows of resources related to pensions will be recognized in pension expense as follows:

Year ended September 30,		
2022	- \$	163,498
2023		346,295
2024		46,205
2025		(110,052)
	\$	445,946

Note 9 - Other Post-employment Benefits

Plan description – The Department provides other post-employment benefits (OPEB) to non-union employees who retire at the minimum age of 60 and have at least 20 or more years of continuous service with the Department. The Board of Public Health is responsible for oversight of this Plan. No assets are accumulated in a trust that meets the criteria in paragraph 4 of Statement 75.

Benefits provided – The Department will pay the annual amount equal to the single maximum hard cap under State of Michigan PA 152. Dependents are not eligible for any employer paid insurance and if coverage is elected for dependents, it will be 100% employee paid. Employees who do not meet the above stated criteria will not receive employer paid benefits upon retirement. Coverage ends at the earlier of a retiree attainment of age 65 or death.

Employees covered by benefit terms – At September 30, 2021, the plan membership consisted of the following:

Active employees	10
Inactive employees or beneficiaries currently receiving benefits	
	10

The plan is closed to new employees.

Total OPEB liability – The total OPEB liability of \$232,286 was measured as of September 30, 2021 and was determined by an actuarial valuation as of that date.

Notes to the Financial Statements September 30, 2021

Actuarial assumptions – The total OPEB liability was determined by an actuarial valuation as of September 30, 2021, using the following actuarial assumptions, applied to all periods included in the measurement.

Inflation Implicit in expected payroll increases
Salary increases 3.5% (for purpose of allocating liability)
Investment rate of return Not applicable, plan is not pre-funded
20-year Aa Municipal bond rate 2.4% (S&P Municipal Bond 20-Year

High Grade Rate Index)

Public General 2010 Employee and

Morality Improvement Scale Healthy Retiree, Headcount weighted

MP-2020

Discount Rate – The discount rate used to measure the total OPEB liability was 2.43%. Because the plan does not have a dedicated OPEB trust, there are not assets projected to be sufficient to make projected future benefit payments of current plan members. For projected benefits that are covered by projected assets, the long-term expected rate was used to discount the projected benefits. From the year that benefit payments were not projected to be covered by the projected assets (the "depletion date"), projected benefits were discounted at a discount rate reflecting a 20-year AA/Aa tax-exempt municipal bond yield. A single equivalent discount rate that yields the same present value of benefits is calculated. This discount rate is used to determine the total OPEB Liability. The discount rate used for September 30, 2020 was 2.14%.

Changes in Total OPEB Liability

Total OPEB Liability	
Service cost	\$ 14,926
Interest on the total OPEB liability	4,969
Experience differences	683
Changes in actuarial assumptions	(5,572)
Net change in total OPEB liability	15,006
Total OPEB liability - beginning	 217,280
Total OPEB liability - ending	\$ 232,286

Sensitivity of the total OPEB liability to changes in the discount rate – The following presents the total OPEB liability of the Department, as well as what the Department's total OPEB liability would be if it were calculated using a discount rate that is 1% lower or 1% higher than the current discount rate.

		Current								
	1%	Decrease	Dis	count Rate	1% Increase					
Total OPEB liability	\$	246,005	\$	232,286	\$	219,152				

Sensitivity of the total OPEB liability to changes in the healthcare cost trend rates – Because the plan provides a stipend and not health insurance, the medical trend is not applicable.

Notes to the Financial Statements September 30, 2021

OPEB expense and deferred outflows of resources and deferred inflows of resources related to OPEB – For the year ended September 30, 2021 the employer recognized OPEB expense of \$18,684. The employer reported deferred inflows and deferred outflows of resources related to OPEB from the following sources:

	Deferred Outflows of				Amount to		
	resources			esources	Amortize		
Differences in experience	\$	624	\$	(8,719)	\$	(8,095)	
Differences in assumptions		14,933		(18,393)		(3,460)	
Total	\$	15,557	\$	(27,112)	\$	(11,555)	

Amounts reported as deferred outflows and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows:

Year ended September 30,	
2022	\$ 1,211
2023	1,211
2024	1,211
2025	1,211
2026	1,211
Thereafter	 5,500
	\$ 11,555

Note 10 - Deferred Compensation Plan

The Department offers its employees deferred compensation plans created in accordance with Internal Revenue Code Section 457. The plans, available to substantially all Department employees, permit them to defer a portion of their salary until future years. The deferred compensation is not available to employees until termination, retirement, death, or unforeseeable emergency. The plans are administered through MetLife Resources, Royal Alliance, and Primary Shareholders Services.

Legislative changes made to 457 plans mandated that no later than January 1, 1999, all existing 457 plan assets must be held in a custodial account, trust, annuity contract for benefit of participants and their beneficiaries.

Once a trust, custodial account, or annuity contract exists, assets are owned or held by the trust, custodian, or insurer for the exclusive benefit of participants and beneficiary, and are not subject to the claims of public employees creditors nor can they be used by the public employee for any purpose other than the payment of benefits to these individuals participating in the plan or their designated beneficiaries. As of September 30, 1999, the Department had implemented changes to be in compliance with these requirements. As a result, the plan assets are not reported in the audited financial statements by the Department because the legislation eliminated the requirements that Section 457 plan assets legally remain the assets of the sponsoring government.

The Department also offers its employees a tax sheltered annuity plan created in accordance with Internal Revenue Code Section 403(b). The plan, available to substantially all Department employees, permits them to make pre-tax contributions into various investment options. The Department has obtained non-profit exemption status under Internal Revenue Code Section 501(c)(3) thus allowing them to create the 403(b) plan. The plan is administered through MetLife Resources.

Mid-Michigan District Health Department Notes to the Financial Statements

September 30, 2021

Note 11 - Contingent Liabilities

Amounts received or receivable from grant agencies are subject to audit and adjustment by grantor agencies, principally the federal government. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount, if any, of expenditures that may be disallowed by the grantor cannot be determined at this time, although the Department expects such amounts, if any, to be immaterial.

Notes: Actuarially determined contribution amounts are calculated as of December 31 each year, which is 21 months prior to the beginning of the fiscal year in which contributions are reported. The actuarially determined contribution (ADC) included in this schedule is calculated as the normal cost payment plus the amortized portion of the unfunded actuarial accrued liability.

Methods and assumptions used to determine contribution rates:

Actuarial cost method Entry age normal cost
Amortization method Level percentage, open

Remaining amortization period 15

Asset valuation method 5-year smoothed value of assets

Inflation2.50%Salary increases3.00%

Investment rate of return 7.35%, net of investment expense

Retirement age 60

Mortality RP-2014 Healthy Annuitant Mortality Tables - 50% male and 50% female blend

RP-2014 Employee Mortality Tables - 50% male and 50% female blend RP-2014 Juvenile Mortality Tables - 50% male and 50% female blend

Notes to Schedule of Contributions

Valuation Date: September 30, 2020

Notes: Actuarially determined contribution amounts are calculated as of September

30 each year, which is 12 months prior to the beginning of the fiscal year in which contributions are reported. The actuarially determined contribution (ADC) included in this schedule is calculated as the normal cost payment plus

the amortized portion of the unfunded actuarial accrued liability.

Methods and assumptions used to determine contribution rates:

Actuarial cost method Entry age normal (level percentage of compensation)

Amortization method Level dollar Remaining amortization period 13 years

Asset valuation method Not applicable, plan is not pre-funded Implicit in expected payroll increases

Healthcare cost trend rates Not applicable

Salary increases 2.50%

Investment rate of return Not applicable, plan is not pre-funded

Retirement age 60

Mortality 2010 Public General Employees and Healthy Retirees, Headcount weighted
